## PROFILE

Enthusiastic and detail-oriented B.Tech graduate in Electronics and Communication Engineering with a strong passion for software development. Proficient in Java, JavaScript, React, Node.js, and MongoDB, I have a solid foundation in both front-end and back-end technologies. Committed to creating efficient, scalable applications, and eager to leverage my technical skills and problem-solving abilities in a dynamic development team.

## PROJECTS

### ● Weather Forecast

This weather forecast application, built using React, provides users with accurate and up-to-date weather information for any location worldwide. Leveraging a third-party API, the app allows users to search for current weather conditions, forecasts, and additional meteorological data with ease. It url is <https://weather-web-kohl-gamma.vercel.app>

### ● Mega Blog Application

This blog application is a full-stack solution built with React, Node.js, and MongoDB, designed to provide a seamless and interactive blogging experience. Users can create, read, update, and delete (CRUD) blog posts, engage with content through likes and comments, and track their interaction history. Utilizes Cloudinary for efficient image and media management, enabling users to upload and display images seamlessly. Secure user registration and login with Google authentication for easy access, alongside email verification to ensure account security. I implemet google authentication in this and use mail verifaction.

### ● HRMS

This HRMS (Human Resource Management System) is a comprehensive web application built with React, Node.js, and MongoDB, designed to streamline employee management processes. The system efficiently manages attendance, leave requests, work tasks, and candidate applications, providing an all-in-one solution for HR teams. Each section includes powerful filtering and searching functionality, making it easy to find specific records and manage large datasets efficiently.

### ● E-Sports Website

This eSports website is a dedicated platform for mobile gaming enthusiasts, allowing users to apply for online competitions with ease. Built with a focus on user experience, the site offers a comprehensive solution for gamers looking to participate in exciting tournaments. It live in production and it url is <https://gamekarao.onrender.com>
